1 Getting Started

1.1 Installing Our System - UNFINISHED

1.2 Getting on the System - UNFINISHED

When connected to the server open your web browser and navigate to localhost:1337 to get started.

1.3 Getting an Account

If you don't have an account then your project coordinator can make accounts to use with the system, if you require an account please talk with them to get one setup with the permissions you require (see [section 1.4](#) for explanation on available permissions).

If you are the project coordinator you will have been given access to **the super admin account**, this account is to make you are admin account only, **it should not be used as an everyday account**, it is there for recovery purposes in the case all other admins lose access to their account, be that through forgot passwords or deletion of account.

1.4 Account Permissions Explained

1.4.1 Read

This allows the user to read all data on the system (minus information only viewable to an admin such as other user information / activity) without being able to edit any of it or make new entries.

1.4.2 Create

Includes all from **Read** but users can now create new records for birds, nest sites and RFID rings. They can also edit the entries that they made but not any others.

1.4.3 Edit

Includes all from **Create** but they can now edit any entry they want, no longer limited to just the ones made by them.

1.4.4 Export

Includes all from **Read** but now has access to exporting to excel spreadsheet functionality in the Birds Table Page (see [section 4](#)).

1.4.5 Admin

Includes all from **Edit** and **Export** with the addition of being able to create, delete and edit Users, and to view User Activity on the system.

1.4.6 Super Admin

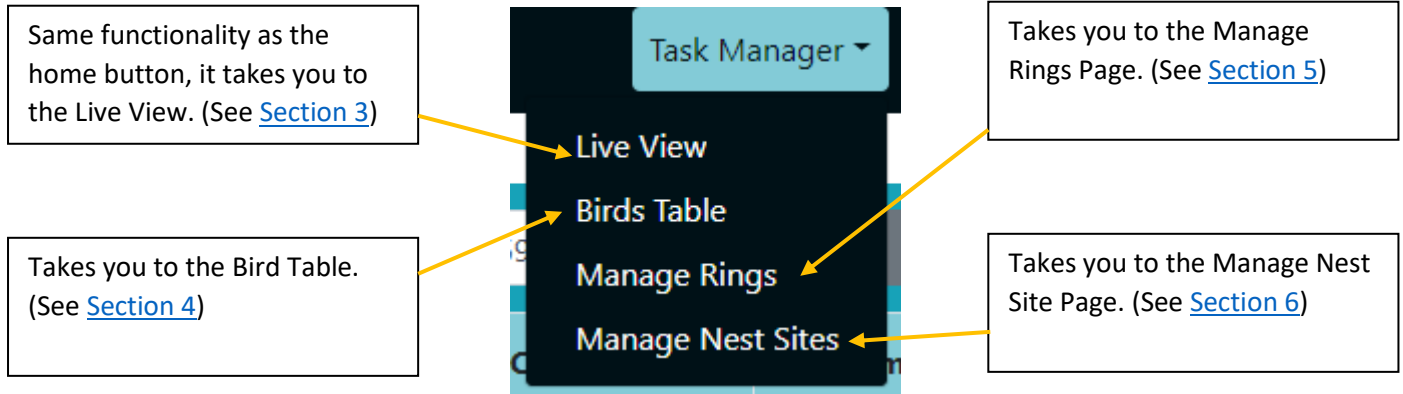

Includes all from **Admin** with the addition that this account cannot be deleted by any others, there should only be one of these at any given time as it is designed to be a recovery account not an everyday use one.

2 Navigation

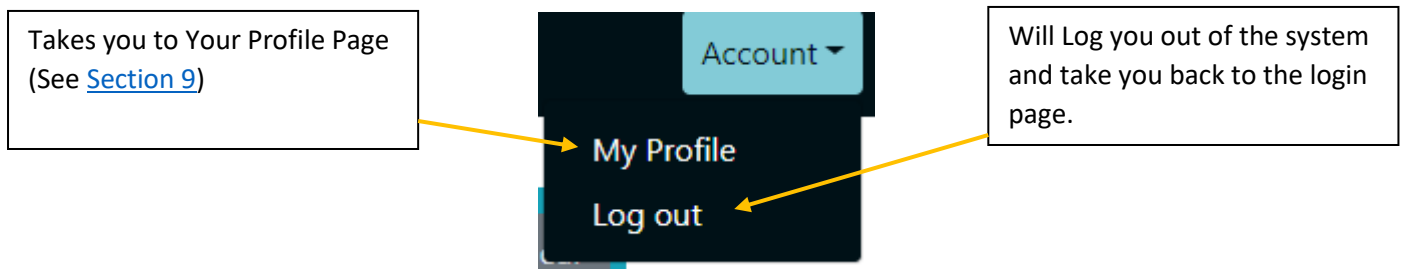

2.1 For Most Users

Once you are logged in, at the top of the page, on the right, you will see 2 menu items allowing navigation throughout the system and on the left a home button to return you back to the starting screen (Live View).

2.1.1 Task Manager

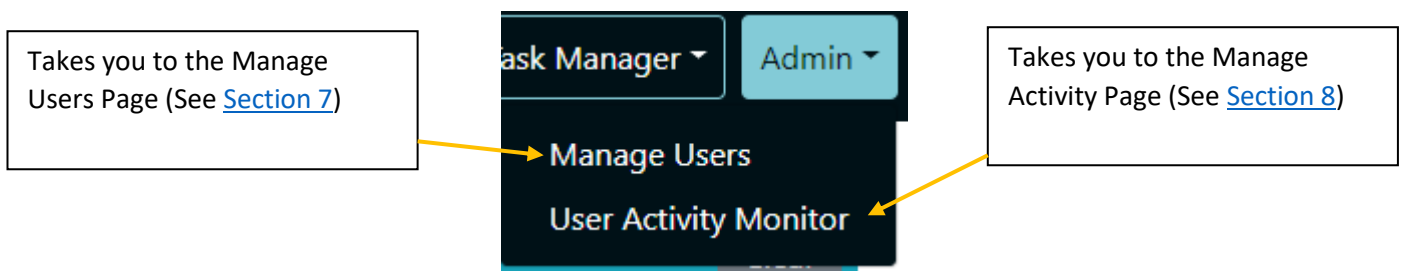

2.1.2 Account

2.2 For Admins

In addition to the above navigation options Admins have one extra menu item on the right side as shown below:

3 Live View

3.1 Summary

This page will display the visits to feeders by birds wearing the RFID rings, it will display visits only for that day and will reset at midnight. As the name suggests, this will update live, so when a new visit is found you will see a notification and you will have the option to refresh to see it. The following section will breakdown the page and how to navigate it.

3.2 Page Explained

common between tables: pages contain this filter bar that will allow you to filter down field to see just what you want, in live view you can search by bird name and you can set the start and end time to show visits from to clear filters just press the button.

Show entries

common between tables: pages in the page bar to switch to different pages, and an option to select how many rows to display per page if steps of (5, 10, 15, 20, 25, 30, All)

When new visits are found this part of the page will update to reflect this fact, and the refresh button will become available to click and fetch these new visits.

1 new visits found, refresh page to see.

Refresh

4 Bird Table

4.1 Summary

This page can be thought of as your digital studbook, it is here where you will be able to access all information stored on the birds. You can pick and choose what columns you want to see, how you want to filter each column and you can export your onscreen view in to the excel spreadsheet that you have grown accustomed to. The following section will breakdown the page and how to navigate it.

4.2 Page Explained

Export will download an excel spreadsheet of all the currently selected columns, the filters will not be carried over, but this can be done through excel through the top bar -> editing -> sort & filter -> filter. Then all columns will have filter buttons added to use.

Columns can be sorted using the arrows next to column names. Clicking on a bird will open a popup view showing all the data on that bird in a more easily readable form than scrolling along the table row. From there you can also edit data on the bird, pressing the register button will also open a similar view, except all entries will be blank for you to fill in.

When selecting add new or edit a popup form will show (see left). As with the rings you can also delete nest sites and columns can be sorted using the arrows next to column names.

7 User Management

7.1 Summary

This is an Admin only part of the system, in which admins can add, remove, and edit users on the system. The following section will breakdown the page and how to navigate it.

7.2 Page Explained

When selecting add new or edit a popup form will show (see right). As with the other tables you can delete users provided it is not the super admin and it is not your own account. Columns can be sorted using the arrows next to column names.

A modal form titled "Register new user" with a close button (X) in the top right corner. It contains four input fields: "Full Name", "Username", "Password", and "Confirm Password". Below these fields is a section titled "Privileges" with five checkboxes: "Read", "Create", "Edit", "Export", and "Admin". Each checkbox has a help icon (i) to its right. At the bottom right of the form is a "Create" button.

The "Manage Users" page features a dark header with a "Home" button, the title "Manage Users", and links for "Task Manager", "Admin", and "Account". A "Register New User" button is located on the left. Below the header is a filter bar with a "Filter by..." dropdown set to "Full Name" and a "Clear" button. A warning message states: "Editing or deleting a user will cause them to be logged out instantly, without a chance to save their work". The main content is a table with four columns: "Full name", "Username", "Privileges", and "Actions". The table lists four users: Vince Admin, Bayley Creator, Seth Editor, and Alexa Exporter. Each user row has an edit icon and a delete icon in the "Actions" column. At the bottom, there is a pagination bar with "Prev", "1", "2", and "Next" buttons, a "Showing 5 entries out of 6" indicator, and a "Show 5 entries" dropdown.

Full name	Username	Privileges	Actions
Vince Admin	admin	<ul style="list-style-type: none">ReadCreateEditExportAdmin	
Bayley Creator	creator	<ul style="list-style-type: none">ReadCreate	
Seth Editor	editor	<ul style="list-style-type: none">ReadCreateEdit	
Alexa Exporter	exporter	<ul style="list-style-type: none">Read	

8 User Activity Monitor

8.1 Summary

Another admin only section, here the admins can view all interactions that the users make with the system, if someone edits data, deletes a bird, etc then this is the place to see who done it, and what exactly what changed. The following section will breakdown the page and how to navigate it.

8.2 Page Explained

User Activity Monitor

If you want to see exactly what has been changed you can press the eye icon and you will see a popup showing the new data and the old data.

9 My Profile

9.1 Summary

This simple page will allow you to change your name and password in the system. The following section will breakdown the page and how to navigate it.

9.2 Page Explained

The screenshot shows the 'My Profile' page within an 'Account Overview' dashboard. The page is divided into two main sections: 'Personal information' and 'Password'. In the 'Personal information' section, the user's name is 'Alexa Exporter', their username is 'exporter', and they were registered on '15/03/2019'. Their privileges are 'Read' and 'Export'. An 'Edit profile' button is located to the right of this section. In the 'Password' section, there is a 'Change password' button. A text box on the right explains that users can change their full name and password on this page, but their username and permissions cannot be changed by the user; these can only be changed by a project coordinator or someone with admin access. Yellow arrows point from the text box to the 'Edit profile' and 'Change password' buttons, and to the name and password fields.

On this page you can change your Full name (in this current release, username cannot be changed for accountability tracking of changes, if you want a new username you will need a new account). Your permissions can not be changed either, this can only be done by your project coordinator or any other person with admin access. You can also change your password here.

10 Error Recovery - UNFINISHED

10.1 Common Solution

For most random issues, a refresh of the page should be all that's needed to get going again, for more special cases see the following sections for help.

10.2 No Data from Feeders
